

Skeletime offers a complete range of wood sanding solutions

#### MODELS TO BE APPLIED TO THE COMMON PAD

<b>HARD</b>	Extremely difficult processing of stucco surfaces / flat and curved
<b>MEDIUM</b>	Machining of surfaces covered with primer or varnish / flat and curved
<b>STRONG RIGID</b>	Processes that require increased rigidity of common rubber backing pads / flat surfaces

#### SPONGE HEIGHTS

<b>12 mm</b>	Recommended for pneumatic sanders, it allows the best support for curvilinear processing
<b>8 mm</b>	Recommended for electric sanders, it prevents vibrations and allows irradiation with medium range of curvilinear support.

#### ACCESSORIES

<b>Skeletime Saver</b>	In the case of worn pads, it increases the grip of the tear-off adhesive and preserves it. With smooth tear-off adhesive increases the grip of the pad itself.
<b>Skeletime Converter</b>	Optimize the finish with the use of abrasive micro-grains, transforming Skeletime from rough to smooth.

#### PRODUCTS LIST

<b>SKELETIME 12 MM HARD</b>	cod. ABX.0148.07	
<b>SKELETIME 8 MM HARD</b>	cod. ABX.0148.08	
<b>SKELETIME 12 MM MEDIUM</b>	cod. ABX.0148.10	
<b>SKELETIME 8 MM MEDIUM</b>	cod. ABX.0148.11	
<b>SKELETIME STRONG RIGID</b>	cod. ABX.0148.13	

#### ACCESSORIES LIST

<b>SKELETIME SAVER</b>	cod. ABX.0148.14	
<b>SKELETIME CONVERTER</b>	cod. ABX.0148.06	

#### KIT INTERFACE PNEUMATIC 12 MM includes

ABX.0148.07 + ABX.0148.10 + ABX.0148.13 + ABX.0148.14 + ABX.0148.06

#### KIT INTERFACE ELECTRIC 8 MM includes

ABX.0148.08 + ABX.0148.11 + ABX.0148.13 + ABX.0148.14 + ABX.0148.06

The new frontier of wood sanding

### Comparison between a traditional sanding and a sanding with Skeletime

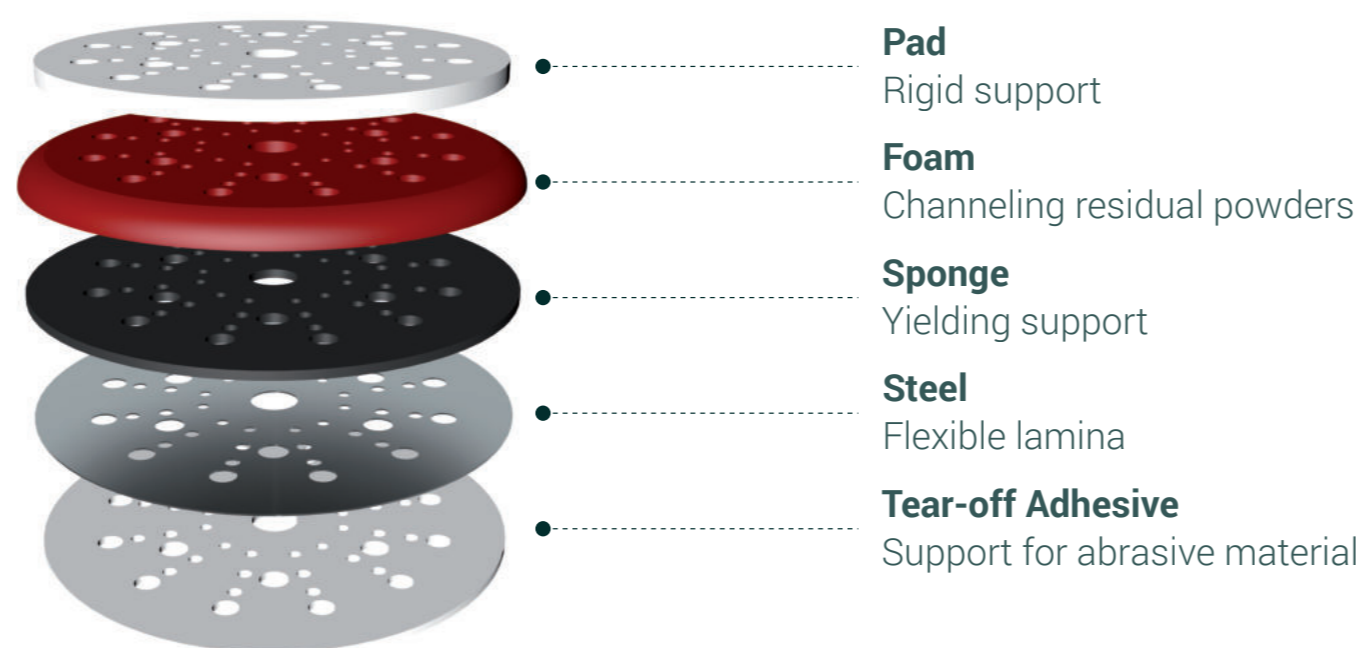

### Skeletime. Adherence to all surfaces

Conventional pads do not fit properly with concave or convex surfaces. **Skeletime perfectly smooths any surface: flat, convex or concave.**

### Skeletime. The innovative pad

Skeletime revolutionizes the world of sanding wood, enhancing the contact surface of the abrasive on the sanding pad.

**The patented system is based on the incomparable adaptability of the pad, which allows all shapes to be leveled homogeneously, satisfying each shape.**

**Skeletime is particularly suitable for those who demand speed and precision in the sanding of furniture, furnishing accessories, doors and windows, profiles and musical instruments.**

### Advantages

**Efficiency** With Skeletime you reduce the hours dedicated to the manual sanding activity by more than 50%.

**Quality** With Skeletime avoid the scratches of the abrasive on the manual pads and reproduce, with the help of fillers and bases, shapes and edges in line with your expectations.

**Precision** With the same granulometry of the abrasive, compared to conventional pads, Skeletime proposes a cushioned sanding and makes the wooden surface more homogeneous and without incisions.

**Yield** With Skeletime, for the same number of abrasive sheets used, you sand much more surface.

**Environment** Make your work spaces healthier by significantly reducing the amount of fine dust.

**Comfort** Compared to the conventional yielding rubber pads, through its innovative metal support, Skeletime breaks down the smoothing undulations.
